Intelligent HVAC temperature control

Meitav-tec, active in the field of HVAC control systems since 1989, is a reputable market leader that develops and manufactures intelligent, cost effective control solutions for all types of HVAC systems.

Our product range is wide, starting from simple thermostats through various controllers for Fan Coil, Air Conditioning, VAV, Multi-Zone, Humidity and AHU up to advanced communicating controllers compatible for B.M.S. projects with protocols, such as BACnet or Modbus.

Our first class, reliable products are well-known among our customers distinguishing us from competitors and allowing us to succeed in this industry. Our products, carrying Meitav-tec's or OEM's brand name, can be found in prestigious hotels and office buildings around the world as well as in private residences or restaurants.

Meitav-tec is represented in more than 25 countries worldwide, and works with agents, distributors and OEM's alike, each with its own market needs and demands. We have special expertise in providing tailor-made solutions as per our customers' particular HVAC needs. Our ability to fulfill special requests within short time and at an affordable price makes us the obvious choice for unique applications.

Meitav-tec is an ISO-9001:2000 certified company, dedicated to develop and manufacture high quality products to ensure reliability and durability. The company implements high standard process control techniques and internal quality management in order to supply superior products, according to customers' specifications.

Meitav-tec is located in Israel, Tel-Aviv area. Its 1400 sq. m embraces all company's facilities including offices, R&D laboratories, a wide production hall and a stock house.
