

PS 4500-P-3S-FC-Super-Native Modbus Protocol

Main Controller All-IN-ONE™
Fan-Coils with proportional outputs (0-10V)
for Cool and Heat valves,
with Native Modbus Protocol

General

The PS 4500-P-3S-FC-SUPER is a main controller for Fan coils applications with Modbus Protocol.

The PS 4500-P-3S-FC-SUPER has most of the applications built-in, field selectable.

This flexibility gives the customers the advantage of having one main controller for most of Fan coils applications.

The PS 4500-P-3S-FC-SUPER has a modular and modern design for the high requirements of the market today.

The PS 4500-P-3S-FC-SUPER is factory pre-program to save valued time on field programming.

Features

- All-In-One system for Fan Coil applications
- Main Input- 220Vac
- Applications with jumper selection:
 - 2-pipe systems
 - 4-pipe systems
 - no valves system
- Proportional outputs (0-10V or 2-10V) for Cool and Heat valves.
- Auto-change over sensor (Mode is set based on temperature of the incoming water flow, ideal for 2-pipe systems)
- Discharge sensor- option (2-pipe systems)
- 3 Speeds output- 220Vac, 3Amp each- with Auto Speed function
- Indoor coil sensor for Heat (soft-start)
- Surface and flush mount thermostats- option
- Fault input dry contact, voltage-free, for occupancy sensor, window contact or fault input
- Occupancy sensor- option with 12Vdc supply
